Cindrella

Accurate Quality with Indefectible Performance

INDUSTRIAL SAFETY EQUIPMENT

Protection • Prevention • Performance

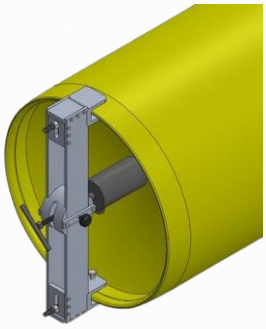

100 kg Tonner Emergency Kit

The 100 kg Tonner Emergency Kit is specially designed to safely control chlorine gas leaks from 100 kg tonners. It contains all the essential tools and sealing devices required to quickly contain leaks and minimize hazardous gas release, ensuring personnel safety.

900 kg Tonner Emergency kit

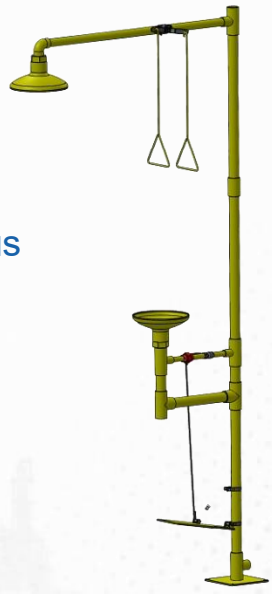

The 900 kg Tonner Emergency Kit is specially designed to safely control chlorine gas leaks from 900 kg tonners. It contains all the essential tools and sealing devices required to quickly contain leaks and minimize hazardous gas release, ensuring personnel safety.

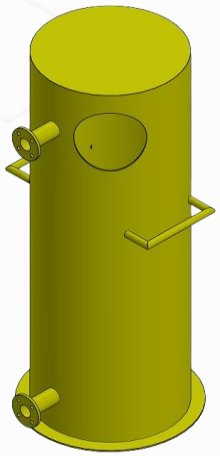

Chlorine Leak Detector

The Chlorine Leak Detector continuously monitors chlorine gas concentration in the workplace and provides instant audible and visual alarms when a leak is detected. It enables early detection, reducing risks to personnel and equipment.

Safety Shower

The Emergency Safety Shower provides immediate decontamination for personnel exposed to hazardous chemicals. It delivers a high flow of clean water to quickly wash away chemical contaminants, minimizing injuries and ensuring workplace safety.

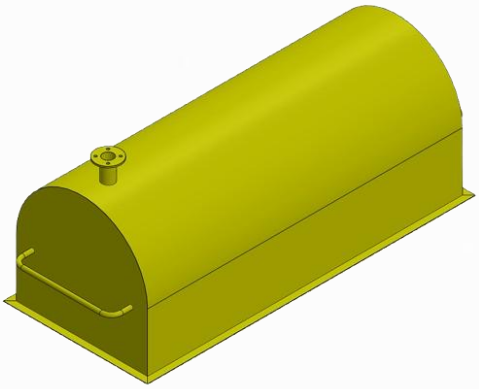

100 kg Tonner Hood

Protective hood used to temporarily seal chlorine leaks from 100 kg tonners, helping minimize gas release until permanent repairs are made.

900 kg Tonner Hood

Robust leak control hood designed for 900 kg chlorine tonners, ensuring effective containment of hazardous gas leaks.

Safety Breathing Apparatus (SCBA)

Self-contained breathing apparatus that supplies clean breathing air, enabling safe operation in toxic or oxygen-deficient environments.

Glass Fronted FRP Cabinet for Breathing Apparatus

Durable FRP storage cabinet with a transparent front, providing secure, weather-resistant, and easily accessible storage for breathing apparatus.

Canister Type Respiratory Mask

Reusable respiratory mask equipped with replaceable canisters to protect users from chlorine gas and other hazardous airborne contaminants.

Wind Sock

Wind direction indicator used during gas leak emergencies to identify wind flow and assist in safe evacuation planning.

PVC Apron

Lightweight, chemical-resistant apron designed to protect the wearer from liquid chemical splashes during handling operations.

PVC Full Suit

Chemical-resistant full-body suit that provides complete protection against hazardous chemical splashes and industrial contaminants.

Safety Gloves

Durable PVC gloves offering excellent resistance to chemicals, oils, acids, and alkalis while ensuring user comfort and flexibility.

Safety Helmet

Industrial safety helmet designed to protect the head from impacts, falling objects, and workplace hazards.

Safety Goggles

Protective goggles that shield the eyes from chemical splashes, dust, airborne particles, and harmful debris.

Safety Shoes

Heavy-duty industrial safety shoes with slip-resistant soles and reinforced toe protection for enhanced workplace safety.
